Capstone Project To a Future Robot Society

Project Guide

Your Task:

Congratulations, Young Time Traveller!

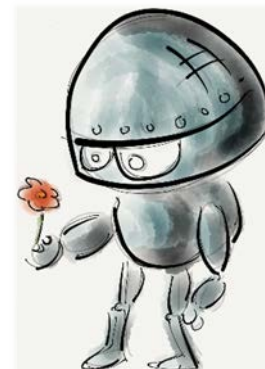

You have already completed a lot of work before you start your Time Travel. A mBot delegation on your behalf had arrived the future Robot Society. mBot(s) and the Robot citizens had held a meeting and exchanged gifts with each other.

Building on this very successful beginning, you were very welcome to pay a visit to the future Robot Society in person. Therefore, you made and used mBot the Time Machine to go to the future Robot Society.

In this final section, you will continue your time travel story scenario and complete your capstone project to demonstrate what the future Robot Society might look like from your perspective and imaginary ideas.

Work in pairs or groups of four to six persons, try to elaborate on your imagination and the narrative from the following aspects:

- Transportation
- Communication
- Governing
- Living
- ...

Your Story:

Choose any one of the above aspects and write down your interpretation and imagination on the future Robot Society in the space below:

Your Design:

Have your characters on the stage. Address the "Who" "Where" "What" and "How" when planing the stage design.

Feedback:

When you complete your project, invite at least one peer to comment on your work:

Write a brief description of your project and publish your animation in the mBlock community.

You can draft it in the space below.

Exit Ticket of the Robot Society

Name:

Date:

1. What are you most proud of about your capstone project?
2. How did you contribute to a positive partnership in this course?
3. What is one compliment that you would like to give your partner (relating to this activity, of course!)?
